Labour Market Trends by Population Groups

- In Nova Scotia, men's employment expanded while women's employment contracted (+0.7% vs -1.3%) over the past month. Men experienced growth in both full-time and part-time employment while women experienced large contraction in full-time employment (-5,100 jobs).
- Older workers (55 years and over) experienced job gains last month, with employment rising by 1.3%. Youth workers (15 to 24 years) and core-aged workers (25 to 54 years) experienced job losses of 1,300 (-1.9%) and 1,700 jobs (-0.5%), respectively.
- Compared to August last year, the employment levels of men increased by 2.8%, led by notable increase in full-time employment (+3.7%). Women's employment levels declined by 1.2%, driven by the contraction in full-time employment (-2.4%). Older workers (55 years and over) experienced the largest number of job gains in the past 12 months, followed by youth (15 to 24 years) and core age workers (15 to 24 years).

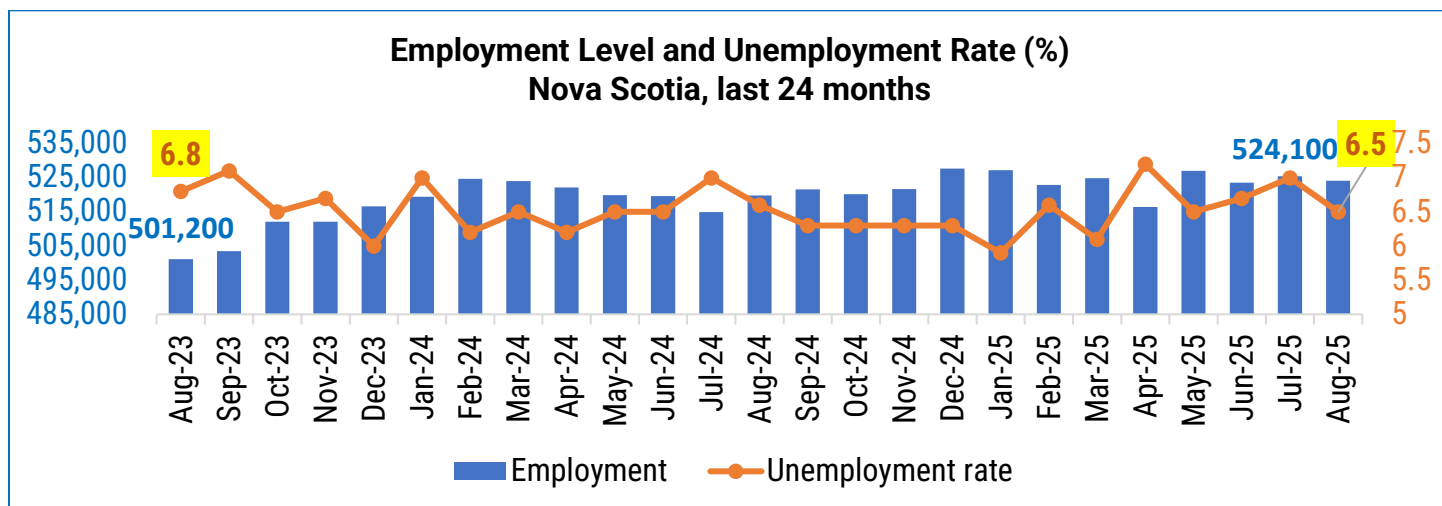

The unemployment rate for young women rose by 4.0 percentage points last month, while that of young men fell by 5.3 percentage points. Among those aged 25 and over, the trend was similar: men saw a 1.0-point decrease in their unemployment rate, while the rate for women rose by 0.3-points.

Nova Scotia Monthly Unemployment Rates, by Sex and Age

Unemployment Rate (%)	Aug-24	Jul-25	Aug-25	Month/month change	Year/year change
Age 15-24	13.6	14.0	13.1	-0.9 pp	-0.5 pp
Men+	16.1	16.6	11.3	-5.3 pp	-4.8 pp
Women+	10.8	11.0	15.0	4.0 pp	4.2 pp
Age 25 and over	5.5	5.8	5.4	-0.4 pp	-0.1 pp
Men+	6.6	7.1	6.1	-1.0 pp	-0.5 pp
Women+	4.3	4.4	4.7	0.3 pp	0.4 pp

Overall Employment and Unemployment Trend

- Employment levels remained elevated in the past twelve months, averaging 1.2% higher than the previous 12-month period.
- Over the past year, the average unemployment rate was 6.5%, staying near historical low levels.

Year-over-Year Employment Change by Economic Region

Employment Trend by Economic Region²

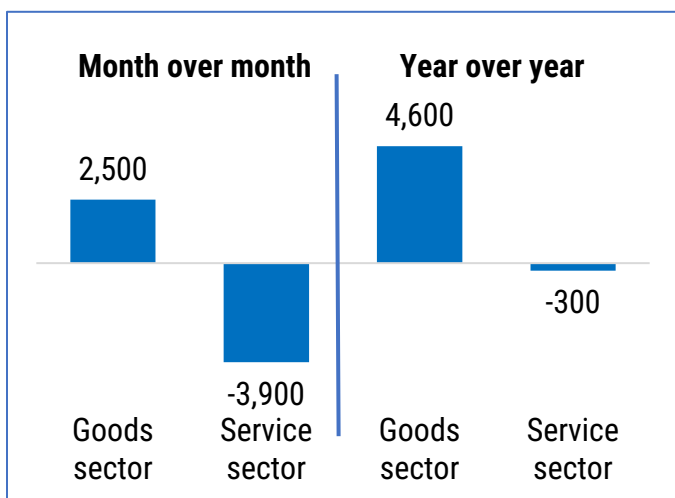

- In August 2025 (three-month average from June to August 2025) compared to July 2025 (May to July 2025), all regions experienced employment contraction except for the Southern region (+0.8%). Cape Breton experienced the highest job losses in Nova Scotia at -2.9%, followed by North Shore (-0.4%), Annapolis Valley (-0.3%), and Halifax (-0.2%).
- Compared to one year ago in August 2024, Annapolis Valley reported job loss while the other four regions recorded job gains.³

² ***Note:** The regional statistics is a 3-month moving average and is seasonally unadjusted. Therefore, it is not comparable to the statistics used in the rest of the report and may show a delay in data demonstrating sudden impacts to labour.

Employment Trend by Industry

- Employment in the service-producing sector fell both month-over-month (-0.9%) and year-over-year (-0.1%) while employment in goods-producing sector rose both month-over-month (+2.6%) and year-over-year (+4.8%).
- In the last month, the top expanding industry was “construction” (+2,500 jobs, +5.8%). The top contracting industry was “accommodation and food services” (-1,300 jobs, -4.2%).
- Compared to twelve months ago (August 2024), employment gains were largest in the “transportation and warehousing” (+3,200 jobs, +15.1%). This was followed by “construction” (+3,200 jobs, +7.6%) & “business, building and other support services” (+2,900 jobs, +17.8%).
- Employment declines compared to twelve months ago were largest in the “accommodation and food services” (-6,500 jobs, -18.0%), “wholesale and retail trade” (-1,700 jobs, -2.2%) & “public administration” (-1,400 jobs, -3.5%).

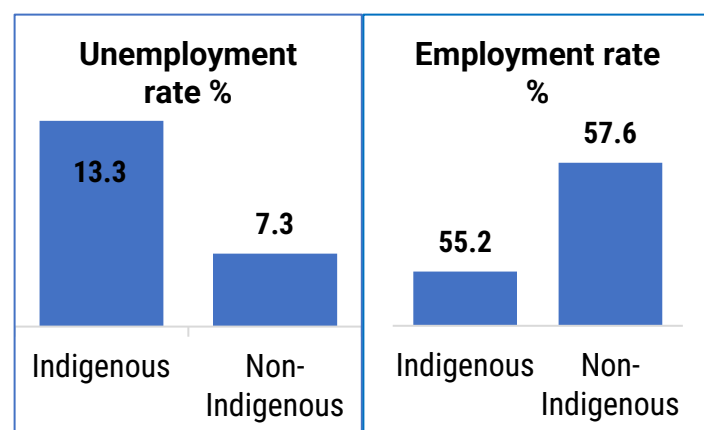

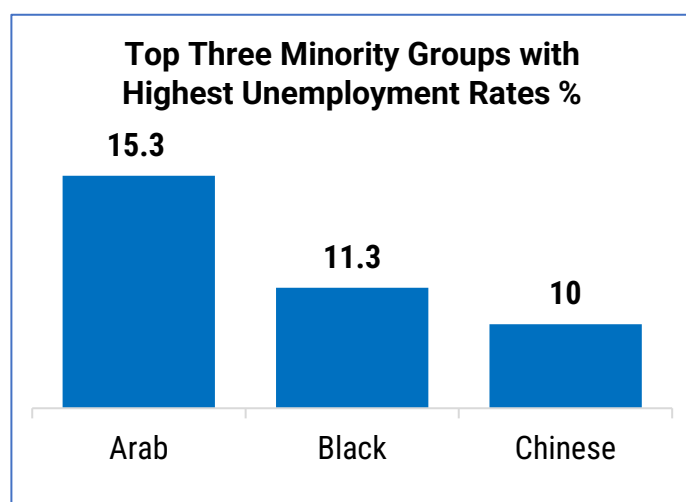

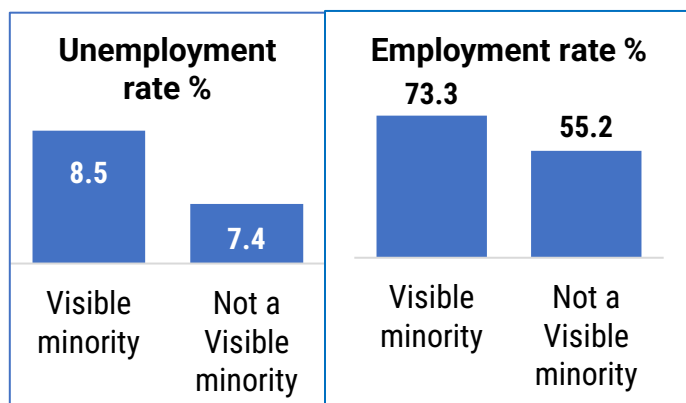

Top Three Industries with Year-over-Year Employment Gains

Top Three Industries with Year-over-Year Employment Loss

Labour Market Outcomes of Diversity Groups in Atlantic Canada⁴

- The employment rate (number of employed for the entire population 15 and over) for visible for non-visible minorities (73.3% vs 55.2%) on average in the last three months ending in August 2025. This can mostly be attributed to the higher labour participation of visible minorities.
- Compared to July 2025 (3-month average from May to July 2025), the employment rate of visible minorities increased by 0.1 percentage points. The employment rate fell by 0.2 percentage points for not visible minorities in Atlantic Canada.
- There are large gaps among different visible minority groups. Among the groups with available data⁵, Arabs, Blacks, and Chinese face the highest unemployment rates (15.3%, 11.3% & 10.0%, respectively), while 5.1% of Filipinos were unemployed in the last three months.
- Indigenous people in Atlantic Canada have an unemployment rate that is well above that of non-indigenous population (13.3% versus 7.3%), while they face a lower employment rate (55.2% versus 57.6%).
- It is worth noting that aggregate data masks the fact that visible minorities and indigenous people face additional labour market barriers.

The next Labour Force Survey will be released on **October 10, 2025**, covering the September 2025 labour market.

Labour Force Survey Glossary

Employment: Employed persons are those who, during the reference week, did any work for pay or profit or had a job and were absent from work.

Employment rate (employment/population ratio): Number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (for example, one defined by age, sex, marital status, or province) is the number employed in that group expressed as a percentage of the population for that group.

Labour force: Civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed. Prior to 1966, persons aged fourteen and over were covered by the survey.

Participation rate: Total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force of that group expressed as a percentage of the population for that group.

Unemployment: Unemployed persons are those who, during reference week, were without work, were available for work and were either on temporary layoff, had looked for work in the past four weeks or had a job to start within the next four weeks.

Unemployment rate: Number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (for example, one defined by age, sex, or marital status) is the number of unemployed persons in that group expressed as a percentage of the labour force for that same group.
