Employment Rate
58.3%

+0.2 pp

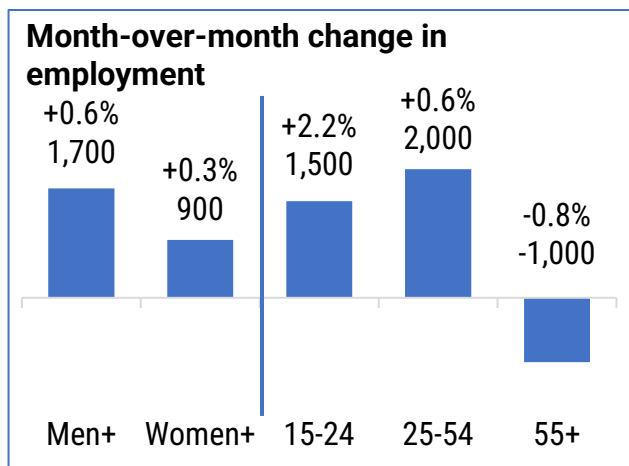

- The labour force expanded by 0.4% to 575,700 (+2,100) in August 2026. The labour participation rate rose 0.1 percentage points to 62.1%.
- Nova Scotia's seasonally adjusted employment level rose by 0.5% in August (+2,600 jobs) with gains in full-time (+2,800 jobs, +0.6%) and losses in part-time employment (-100 jobs, -0.1%). (Individuals switching between full-time and part-time status are also included in these statistics.)
- Nova Scotia's unemployment rate dropped to 6.1% in August, as the 0.5% employment expansion outpaced the 0.4% labour force expansion. For context, the province's unemployment rate has averaged 10.0% since 1976.
- The employment rate (number of employed as a proportion of the population aged fifteen and over) rose 0.2 percentage points to 58.3% in August.

Labour Market Trends by Population Groups

- In August 2026, employment increased for both men and women, with gains of 1,700 jobs (+0.6%) and 900 jobs (+0.3%), respectively. Among men, employment growth consisted of larger gains in part-time jobs (+1,300 jobs) than in full-time jobs (+500 jobs). For women, there were employment gains in full-time work (+2,200 jobs), partially offset by a loss of 1,400 part-time jobs.
- Core-aged workers (25-54 years) and youth (15-24 years) experienced employment growth in August 2026, gaining 2,000 jobs (+0.6%) and 1,500 jobs (+2.2%), respectively. In comparison, older workers (55 years and over) lost 1,000 jobs (-0.8%).

- Compared with August 2025, employment expanded for both men (+2.2%) and women (+4.3%). Men's gains were mostly driven by part-time work (+3,600 jobs), alongside a more modest gain in full-time employment (+2,400 jobs). Women's employment growth was led by full-time employment (+8,900 jobs), followed by part-time employment (+1,600).
- Over the past 12 months, employment rose among workers (+3,000 jobs, +4.5%). Older workers lost 2,300 jobs (-1.9%).

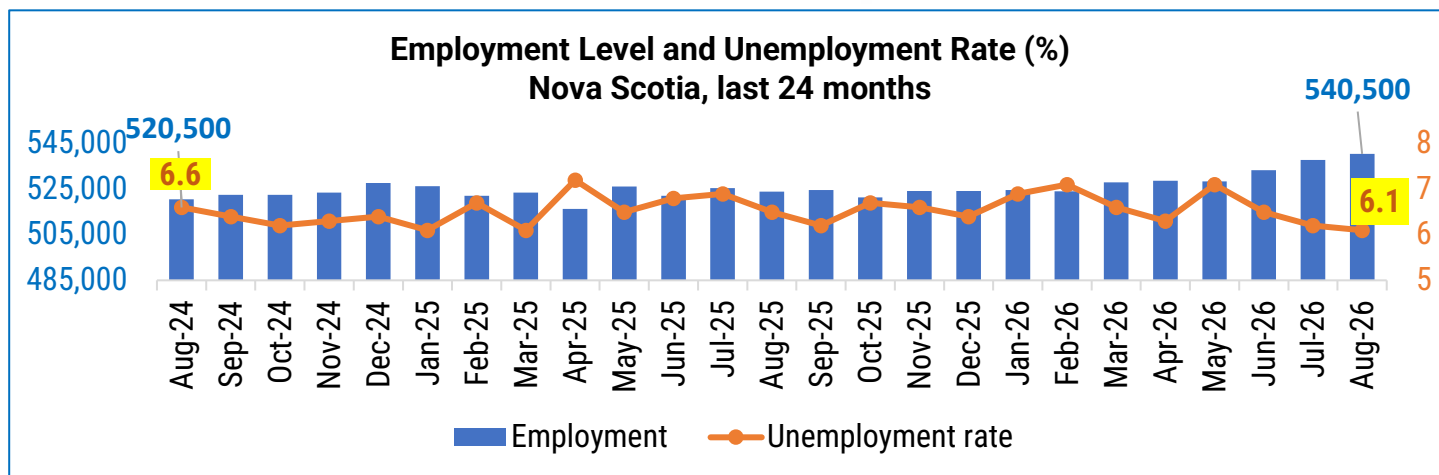

In August 2026, the unemployment rate declined for both young men and young women. Among those aged 25+, the unemployment rate rose for men and declined for women.

Nova Scotia Monthly Unemployment Rates, by Gender and Age

Unemployment Rate (%)	Aug-25	Jul-26	Aug-26	Month/month change	Year/year change
Age 15-24	13.0	11.8	10.1	-1.7 pp	-2.9 pp
Men+	11.4	10.8	9.4	-1.4 pp	-2.0 pp
Women+	14.9	12.7	11.0	-1.7 pp	-3.9 pp
Age 25 and over	5.5	5.4	5.5	0.1 pp	0.0 pp
Men+	6.1	5.5	6.0	0.5 pp	-0.1 pp
Women+	4.7	5.2	4.9	-0.3 pp	0.2 pp

Overall Employment and Unemployment Trend

- Employment levels remained elevated in the past twelve months, averaging 0.9% higher than the previous 12-month period.
- Over the past year, the average unemployment rate was 6.6%, 0.1 percentage points higher than the previous 12-month period.

Employment Trend by Economic Region²

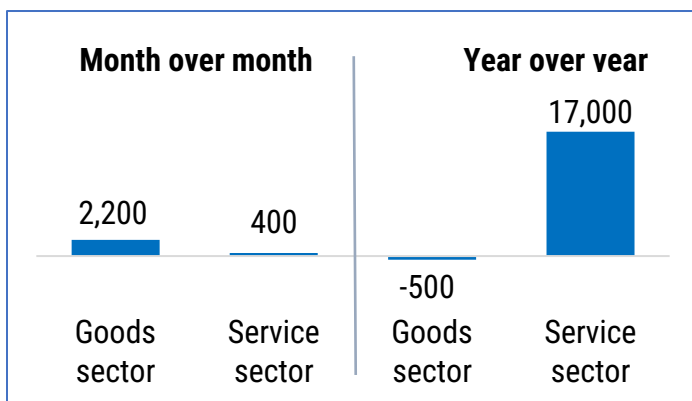

Year-over-Year Employment Change by Economic Region

- In August 2026 (three-month average from June 2026 to August 2026), compared to July 2026 (May 2026 to July 2026), North Shore (+1.7%), Annapolis Valley (+1.2%), Cape Breton (+0.3%), and Halifax (+0.3%) experienced job gains. Southern (-1.7%) experienced job losses.
- Compared with August 2025, all regions experienced job gains except Southern, which experienced losses (-0.4%).

² ***Note:** The regional statistics is a 3-month moving average and is seasonally unadjusted. Therefore, it is not comparable to the statistics used in the rest of the report and may show a delay in data demonstrating sudden impacts to labour.

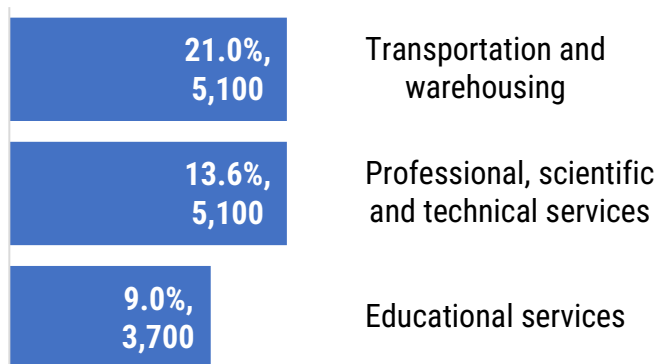

Employment Trend by Industry

- Employment in the goods-producing sector rose month-over-month (+2.3%) and fell year-over-year (-0.5%), while employment in the services-producing sector rose both month-over-month (+0.1%) and year-over-year (+4.0%).

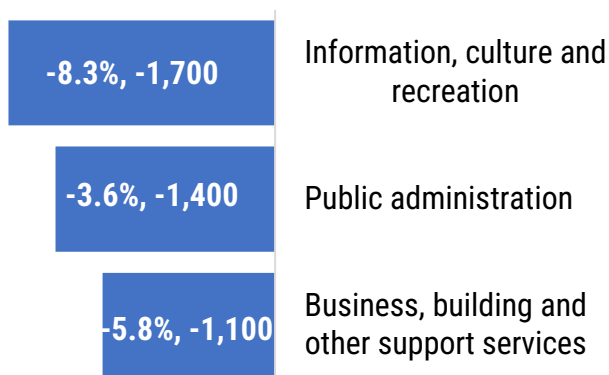

- In the last month, the top expanding industry was “manufacturing” (+2,400 jobs, +7.0%). The top contracting industry was “health care and social assistance” (-1,300 jobs, -1.5%).

Top Three Industries with Year-over-Year Employment Gains

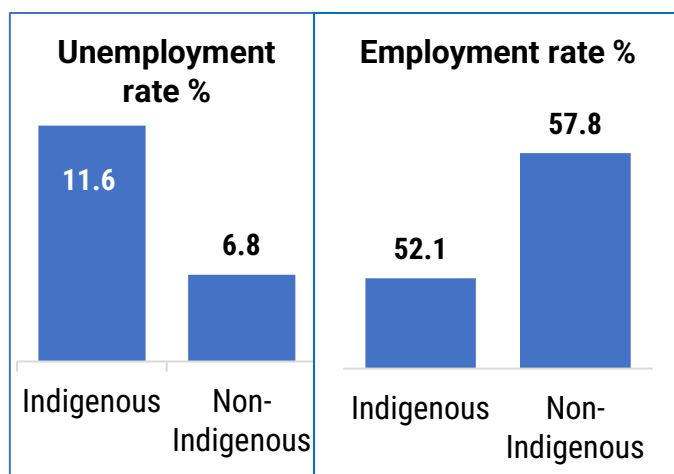

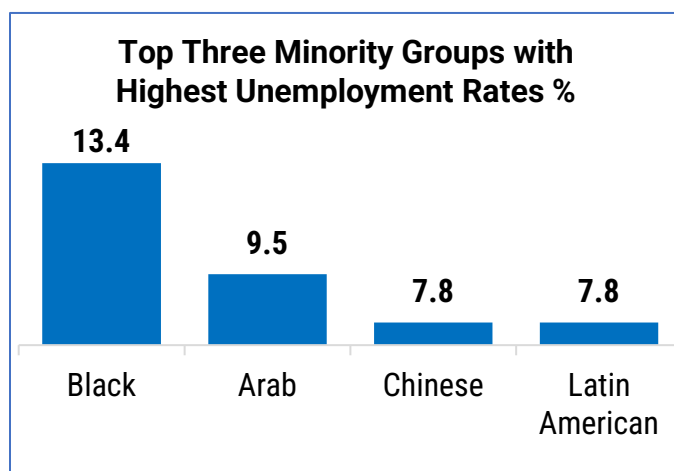

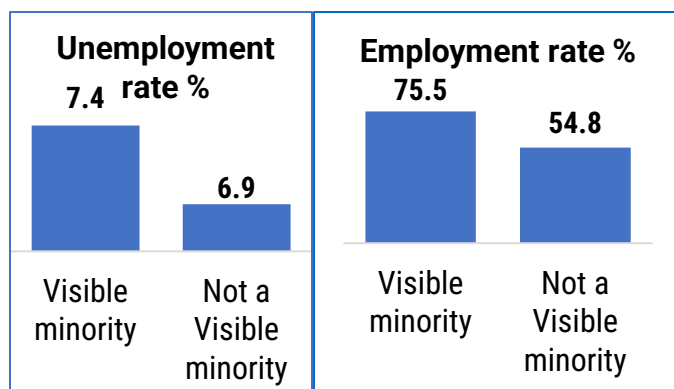

- Compared to twelve months ago (August 2025), employment gains were largest in “transportation and warehousing” (5,100 jobs, +21.0%). This was followed by “professional, scientific and technical services” (+5,100 jobs, +13.6%) & “educational services” (+3,700 jobs, +9.0%).

Top Three Industries with Year-over-Year Employment Loss

- Employment declines compared to twelve months ago were largest in “information, culture and recreation” (-1,700 jobs, -8.3%), “public administration” (-1,400 jobs, -3.6%), and “business, building and other support services” (-1,100 jobs, -5.8%).

Labour Market Outcomes of Diversity Groups in Atlantic Canada³

- The employment rate (number of employed for and non-visible minorities) for visible minorities was higher than that of non-visible minorities (75.5% vs 54.8%) on average in the last three months ending in August 2026. This can mostly be attributed to the higher labour participation of visible minorities.
- Compared to August 2026 (3-month average from June 2026 to August 2026), the employment rate of visible minorities fell by 0.1 percentage points, while that of non-visible minorities rose by 0.2 percentage points in Atlantic Canada.
- Among the groups with available data⁴, Black (13.4%) and Arab (9.5%) people face the highest unemployment rates. Chinese and Latin Americans are tied for third at 7.8%. South Asians and Filipinos had the lowest unemployment rate (4.6% each) in the last three months.
- Over the three months ending in August 2026, Indigenous people in Atlantic Canada had a higher unemployment rate than the non-Indigenous population (11.6% versus 6.8%) and a lower employment rate (52.1% versus 57.8%). Compared with the three-month period ending in July 2026, the Indigenous employment rate decreased by 1.2 percentage points. Aggregate data masks the fact that visible minorities and indigenous people face additional labour market barriers.

⁴ Data not available for West Asian, Korean, and Japanese minority groups.

The next Labour Force Survey will be released on **October 9, 2026**, covering the August 2026 labour market.

Labour Force Survey Glossary

Employment: Employed persons are those who, during the reference week, did any work for pay or profit or had a job and were absent from work.

Employment rate (employment/population ratio): Number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (for example, one defined by age, gender, marital status, or province) is the number employed in that group expressed as a percentage of the population for that group.

Labour force: Civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed. Prior to 1966, persons aged fourteen and over were covered by the survey.

Participation rate: Total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force of that group expressed as a percentage of the population for that group.

Unemployment: Unemployed persons are those who, during reference week, were without work, were available for work and were either on temporary layoff, had looked for work in the past four weeks or had a job to start within the next four weeks.

Unemployment rate: Number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (for example, one defined by age, gender, or marital status) is the number of unemployed persons in that group expressed as a percentage of the labour force for that same group.
